

NEW
MODEL

chocolate
coating belt

The machine is equipped
with a touch screen panel

The working width is 600mm

The heating lamps and the resistances
located under the belt are controlled
electronically

Ability to set the velocity
and functionality of the air blower

The tail cutting roller is electronically
controlled

The machine is equipped
with a plexiglass cover

Purposely built for connecting to the TUNNEL 600 but it can also be connected to existing cooling machines. The stainless steel belt has a width of 600 mm and is divided into two parts: the loading section and the coating section, both of which are protected by a special cover. The machine has 4 independently thermoregulated resistances located in the various operational zones. The belt and the blower are controlled via a LCD screen which allows for the optimisation of the coating base of the product.

Technical data

Electrical specification: 400v 3-phase 50/60 hz
Option: 230v 3-phase
Power consumption: 3 kw
Electrical supply plug: 16A 5 poles
Dimension: w. 1400 mm, d. 1400 mm, h. 1350 mm
